

**DESIGN
BUILD**

REIMAGINED

11-13 OCTOBER 2021

**International Convention
Centre Sydney**

We're excited to exhibit at Australia's largest built environment industry event, DesignBUILD, when it returns to Sydney from 11 -13 October 2021 at the International Convention Centre (ICC).

Built over more than 30 years but with a forward vision for a better built environment, DesignBUILD is leveraging on their experience, celebrating quality products, sustainable solutions and knowledge exchanges in commercial design and construction.

This is a new DesignBUILD that sees a co-location with Total Facilities, Australia's leading event for the Facilities Management and the Be Summit, a one-day event bringing together Australia's built environment leaders, government policymakers, and market experts.

Plus, the UK's leading platform for innovation and technology in the built environment, Digital Construction Week (DCW), will be making its debut into the Australian market right at DesignBUILD. The new Digital Building Zone will also feature on the show floor, looking towards the future of construction technology and smart buildings.

Gain access to complete strategies and solutions across the building lifecycle, as DesignBUILD gives you a platform to discover new markets, create new opportunities and build connections as they reunite the industry.

Join us for DesignBUILD Reimagined. For more information visit designbuildexpo.com.au and don't forget to register for free and quick entry!
